

Rectangular duct fans

Caissons de ventilation pour gaines rectangulaires

Rechteckige Kanalventilatoren

Прямоугольные каналные вентиляторы

Rectangular ducts fans for ventilation and air conditioning systems, mounted into a system of rectangular air ducts. Used for the air supply or extract. Not suitable for polluted air, aggressive and explosive gases. Compact, mounted in any position. Easily opened doors for cleaning an impeller.

Impeller with backward curved blades, made of plastic or galvanized steel.

Motor: external rotor, motor protection with built-in thermal-contact, maintenance free ball bearings.

Housing: made of galvanized steel.

Rechteckige Kanalventilatoren, die für Lüftungs- und Klimaanlagen bestimmt sind, werden in das System der rechteckigen Luftführungskanäle montiert. Sie werden für Zuluft und Abluft verwendet. Nicht geeignet für die Beförderung von verschmutzter Luft, aggressiven, explosiven Gasen. Kompakt, leise funktionierend, Montage in jeder beliebigen Stellung, das Flügelwerk ist leicht zur Reinigung herausnehmbar.

Laufrad ist rückwärts gekrümmt, aus Kunststoff bzw. verzinktem Stahl.

Der Motor: Außenrotor, Direktantrieb, integrierter Thermokontakt-Motorschutz, dauerhafte, keine Pflege erfordernde Lager.

Das Gehäuse: aus verzinktem Blech.

Les caissons de ventilation pour gaines rectangulaires sont destinés aux systèmes de ventilation et de climatisation utilisant des conduits rectangulaires. Ils s'utilisent en apport d'air neuf ou en extraction. Ces caissons ne conviennent pas au transport d'air fortement pollué, de gaz agressifs ou explosifs. Ils sont compacts, fonctionnent silencieusement et peuvent être installés dans n'importe qu'elle position. La turbine s'enlève facilement pour l'entretien.

Turbine : pales incurvées vers l'arrière, plastique ou acier galvanisé.

Moteur : à rotor externe, entraînement direct avec protection thermique intégrée (PTO), roulements graissés à vie ne nécessitant pas d'entretien.

Enveloppe : tôle d'acier galvanisée.

Прямоугольные каналные вентиляторы для систем вентиляции и кондиционирования, устанавливаются в систему прямоугольных воздуховодов. Эксплуатируются в целях подачи и вытяжки воздуха. Не используются при транспортировке загрязнённого воздуха, агрессивных, взрывоопасных газов. Компактные, бесшумные, устанавливаются в любом положении, крыльчатка легко извлекается для чистки.

Крыльчатка: загнутые назад лопатки, пластмасса или оцинкованная сталь.

Двигатель: наружный ротор, прямая передача, встроенные термоконтакты двигателя, не требующие ухода подшипники с длительным сроком службы.

Корпус: оцинкованной жести.

Accessories

Single phase speed controller

Three phase speed controller

Monophase speed controller

Flexible connection

Rectangular duct silencer

Filter cassette

Electrical duct heater
